Assignment 6

Project Pitch: **Employee Time Tracker**

Description: A database centered system that will track employee time that is being spent on a project. The users will be the Administrator, and the employees.

Page	Purpose	Users
Log	Shows a summary of the employee log.	Employee
Reports	Gives a report of the hours spent on a project.	Employee
Projects	Shows the projects listed	Employee
Administration	Gives the administrator the right to make Super User changes as needed.	Administrator

The purpose of this project is to give a potential business a recordable log that can be updated and edited at any time. This will be used so that when an employee is at a job site or working on a job they can track their hours and give an account of the work that was done on the job. This will consist of an Administrator account which has rights to make any and all changes and an Employee account or multiple employee accounts which will be used on the job site.
